A B O U T   M E

When I first came across programming and printed out my first "Hello World" and for a second felt like superman, I knew this is where I belong.

A personal rule of thumb: is keeping a learning attitude. This rule has enabled me to acquire new skills and methods to tackle projects as well as build a strong network. My achievements are as a result of my passion and zeal to grow. I'm that type of a person who likes it when things are not working for it shows that there's a challenge and up ahead.

S K I L L S

- Java
- Springboot
- MySQL
- PostgreSQL
- Thymeleaf
- HTML
- CSS
- JavaScript
- Bootstrap
- React
- Python
- Linux
- Git
- Kotlin
